are paying the penalty.

There is now a great rivalry between peadwood and Leadville as to which city go far to reoder the project impracticable. raises the most money to send missionaries

the United States for the relief of Irish consternation by the British refiners. The distress during the last twelve months.

Green River city, Dakota, the present terminus of the Northern Pacific road, is certainty in the English market. Fearing five weeks old, and already has six hotels, an opera house, two wholesale liquor stores, two dance-houses, a bank and two stores.

England or India will have to pay.

According to Mr. Snowden, of the United States mint, 65,815,500 silver dollars have already been coined under the acts of 1878, of which only 6,000,000 are in circulation. Mr. Snowden places 100,000, 6d. per cwt." 000 of accumulation as the limit where the United States may be converted into a single silver standard nation.

A Copenhagen watchmaker has constructed an electro-motor, to be applied to a clock, by which the timepiece is enabled

It is estimated that the coal fields of 000 tons of coal in the empire. The law's proverbial delay has been

a decision in her favor in a question of title, the lands having been given her ancestor by Louis XV, one hundred and eleven

It is an odd fact that the extensive use It is an odd fact that the extensive use News reports the case of Bradley against of beer in New York has greatly decreased Logan. The action was brought on a drunkenness, and the strange sight of thousands of people returning from Coney Island on Sundays perfectly sober, is exbeer and light wines instead of the hot-blooded whiskey.

defendant objected that the plaintiff gave himself no title. It was proved that there

The population of all the States in the Union, as compiled by the Herald, amounts to 49,302,144. The population of six of the Territories, given at 563,998, swells the total to 49,865,132. The population of the four remaining Territories will undoubtedly bring the grand total up to 50,000,000. This is an increase of 11,700,-000 during the past ten years-something

The yield of the Cuban sugar crop this in all parts of the island, July 31, 1880, amounted to 10,491 tons against 33,871 tons the year preceding.

THE DEST OF MEXICO.—Mexico, though | kaik are scattered. one of the richest of countries in latent resources, is yet one of the poorest in realised our guide, "that house way-ah you see the wealth. Mexico owes to Europeau credit-ors in bonds and other obligations \$125,-Here we passed a quiet hors ors in bonds and other obligations \$125,000,000, and to the United States about little boys perched on his bare back; these \$2,700,000. No part of the principal of this European debt has been paid during dame, the Maori: "Why you boys not say the last twenty years, nor has any interest 'chee up Neddy, chee wo?" the last twenty years, nor has any interest been paid since 1861. For a country of been paid since 1861. For a country of such immense natural resources this might not be considered a formidable debt, were chorus of angry defiance. Passing what it not for the small amount of industrial development. There are probably single came to a large wood fire, fringed round mines in Mexico which would yield an with Maori men and boys. After a short amount equal to the entire indebtedness of delay we were taken into the lighted house,

A modification of the telephone has been utilized by Prof. Roberts, of the London mint, to detect spurious coin. Two equally strong and rapidly intermittent currents of were hung with little banches of fair, small electricity are passed over two coils connected by a wire. A coin, known to be good, is placed in one coil, and the current narrow, and covered with a fair white being disturbed, the telephone registers the fact. Another coin is placed in the second coil. If good, the equilibrium is restored and the indicator is silent; if counterfeit, were arranged plates of cake and biscuits; the consequent disturbance is noted. The

CHINESE MEDICINES. - Some peculiar medicines are employed by the Chinese. Calcined and powdered antelope horns are used in cases of convulsions, rheumatism, and even appoplexy. Plasters of elephant skin are believed to cure bruises very quickly. Pills made from the sloughs of quickly. Pills made from the sloughs of caterpiller larve are taken to expel worms and relieve headache. Inflammation of the lungs is treated with glue from the hides of doukeys. A coholic preparations of scorpions are given in all kinds of maiadies. For most internal diseases, a powdered insect, the name of which has not been determined, is administered. The skins of serpents applied to the body are supposed to cure leprosy, rheumatism and paralysis. A mucus obtained from toads and mixed with flour is used to stimulate the nostrils in cases of faints and convulsions.

to cure leproay, rheumatism and paralysis. A mucus obtained from toads and mixed with flour is used to stimulate the nostrils in cases of faints and convulsions.

A new, and, it is claimed, effective system of water purification, devised by Messrs. F. H. Atkins & Co., of London, has been introduced at the Royal Aquarium, Westminster. The impure water is run into a cistern, a small proportion being passed, on its way there, through a cylinder filled with lime. The limewater mixing with the body of the water in the cistern, purifice it, softens it, and coagulates the clay held in suspension. The water is then passed through three disos, each two feet in diameter and covered with filter-cloth, in which the coagulated clay is retained. These filters can be easily cleaned, and will discharge 30 to 100 gallons of pure water per square foot of surface per hour, where the ordinary filter discharges but from two to six gallons.

The length of the proposed canal through Florida to connect the Gulf of Mexico and the Atlantic, according to the surveys of General Gilmore, is about 169 statute miles. The scheme contemplates a ship cause of 122 miles, with 34 miles of river mayigation and 13 miles of deeper water

Messer Momeru, the father, was called

SATURDAY PRESS. from bar to mouth of the St. Mary's and on the other side the entrance to the gulf. The lowest estimate of the cost is \$50,000,000. The completion of the canal would shorten the ocean route from New Orleans to New York 497 miles; that from Paterson, N. J. has a diphtheria epidemic. New Orleans to Liverpool 412 miles. While It is the old story of neglecting ordinary it would be in every way desirable to cut sanitary rules, and now the poor people a canal through Florida, as proposed, it would seem that the great expense neces-

The reduction of the duty on sugar in James Redpath estimates that no less bounties by the government for the exthan \$5,000,000 has been contributed in portation of refined sugar, is viewed with operation of the new rule begins October 1, and its effect already is to cause great una glut of arrivals from French ports, the English sugar-refining interests are, in consequence, at a stand-still. The operation of Every month that the English troops remain in Afghanistan, says the London Echo, more than half a million pounds must be added to the bill which either of glucose, or uncrystallizable, from the of glucose, or uncrystallizable, from the crystallizable sugar; but in assessing the moist, refined sugar, the glucose or uncrystallizable portion is included. At the new rate of duty this will give an export bounty exceeding 6f. the 100 kilos, or 2s.

CHILDREN'S FOOD .- Mrs. L. M. P. asks concerning the propriety of giving young children "whatever is on the table." It depends on what is on the table. Tea, coffee, meat, pastry, sweet cake and pudto run a year with but an occasional remewal of the elements of the battery.

dings are very unsuitable food for children.

Milk and substances which can be dissolved in the milk as barley faring corn starch. dings are very unsuitable food for children. in the milk, as barley, farina, corn starch, It is estimated that the coal fields of India extend over an area of 35,000 square for children. In an asylum in this city in miles. Seams of 100, 120 and 160 feet in which large numbers of children are cared thickness have been noted. Dr. Oldham for, they are allowed only the last named believes there are not less than 20,000,000,- foods until they are seven years of age, and this not from motives of economy but because such food is best for them. Disforcibly illustrated in France, where Mile. eases of the eyes, of the teeth, of the bowels, Pallix, an octogenarian, has been awarded all arise in children from improper feeding. -N. Y. Tribune.

As to the use and meaning of the word "Esquire," the Albany Law Journal contributes the following: "The Canada Legal plained by the use pretty much entirely of | iff shall state his occupation or quality. The A natural result of the late hard times is no such title in this country. But the in Ireland has been a falling of in the num- court said : 'The exception of the defendant ber of marriages. In 1879 the number was is wanting in this, that it does not say in but 23.313, or 3,596 less than the average for the twelve preceding years, and 149 less than the total for Scotland, which has a population nearly two millions less than Ireland.

what respect the description is defective. It complains of the total want of description; but the quality of esquire is sufficient in itself, and in our law has no significance, and I see in our law has no significance, and I see that the plaintiff is not an esquire as we understand, though the title has no significance in the United States. Abbott's Law Dictionary says: 'It is familiarly employed in the United States, but is a title of courtesy merely.' Webster says it is 'a general title of respect in addressing letters.

A Maori Firthday Feast.

The following sketch of life among the Maoris of New Zealand (who it is wellyear has been about 545,400 tons, against, known are a cognate people with the Ha-680,000 tons last year, showing a decrease waiians) we copy from the Otago Witness. of about 20 per cent. The exports from all A stroll between daylight and moonlight ports on the Island from January 1 to through the pleasant Maori grounds—some-July 31, to the United States, were 66,413 times walking on grass, sometimes on a 91,810 rough, narrow road, sometimes pushing boxes, 625,277 hogsheads in 1879. Stocks close under the bush to avoid the soft places, but always going on-soon brought us within sight of the little hollow close by the shore, where the cottages that form the

"Tha-ah, ' said the wise, trim, old Maori,

seemed to be the skeleton of a house, we a strong wooden cottage, like one long room, which was swept and garnished round about with many small boughs of the sweet-scented torato, while the rafters bottles gaily decorated to hold the candles, currents are affected similarly only by a few flowers, cruet-stands, bottles of chow-equal volumes of metal and alloy. chow; but, Maori-like, no satt. By every knife and fork stood a cup and saucer, for our Maoris are a sober folk, though gay. At one end two or three of the chief Maori men were well dressed in the Pakeha gar-ments, while Mrs. Hampstead (formerly Kenawa), the only daughter of the Mome-rues, and Amelia, wife of Pukuku, the Maori minister, and some others were seated; while old Mrs. Momeru went wandering

upon for a speech, and presented himself with a cheerful face. He declared that he had not many words to say, but for all that the rogue proved that he had a keen sense of what would be popular among the party he was addressing.

H. HACKFELD & CO.

N. NEUFELD, GRAND, SQUARE AND UPRIGHT PIANO-MAKER, BERLIN.

R. Hackfeld & Co., Agents for the Hawaiian Islands

The Sydney Mail, Saturday, January 17, 1880, pages 117, 118. Pianofortes in the Exhibition.

Pianofortes in the Exhibition.

In our previous notice of the Pianos in the Exhibition (No. IV.) in connection with those of the German Court, we were unable to do more than enumerate the exhibits of L. NEUFELD, of Berlin, and that enumeration was erroneous. Since writing that notice, the Sydney agents, Messrs. Rabone, Feez & Co., have given us an apportunity of seeing the instruments, of which four are exhibited instead of two, as formerly stated. The First is a Grand of full compass. 7% octaves overstrung, "an acoustical metal frame in agraffs, the action is perfect unfailing repetition." All the modern improvements are applied; the instrument is cased in wainut, of fine tone and light touch, and being in addition by far the most priceworthy ought to command the most ready market.

No. 2 is an upright cottage grand, with iron frame overstrung, well finished, and cased in a handsome frame in the Louis Quatorze style. No. 3 is an opright cottage, simpler in the exterior, but with substintial metal frame, and all the extenses of thorough care in the internal construction. No. 4 is an overstrung upright boudoir cottage of very agreeable tone.

Having thoroughly examined the workmanship and construction, and tested tone and touch, we are able to speak with confidence on the sterling merits of these instruments, especially when we compare the prices with those of other exhibits. 128 Planos are now on exhibition at the store of

FO CALL AND SEE. SE [IY CHALMERS-SPENCE 'AIR SPACE,

AND FOWLER'S YUCCA BOILER COVERING

Patented January 19, 1866. Has been victorious over all other devices for covering olders with which it has been brought into competion, both in Europe and America, for the past twelve ears. Endorseed by the Scientific American and London regineering everywhere as being the best Non-connector, the most Reliable, the most Economical.

THE AIR SPACE. The "Air Space" is a mechanical device. The old method of covering boilers, steam and other hot pipes, was to smear a coating of plaster over the boliers and pipes, and directly in contact with the hot surfaces. Common sense teaches that any compound thus applied will soon have the life burnt out of it, and that the expansion and contraction of the metal over which it is smeared, will cause it to loosen and crack, so that it will, after a time, fall off. Besides this, experience has proved that the lime and other compounds used for this purpose, when applied direct to the bolier surfaces, corrodes the boliers so as to greatly injure them.

The Air Space serves a two-fold purpose; first it provides a stratum of air entirely around the bolier, which is the best known non-conductor of heat. Second, it

il known holler coverings; counsequently there is a sater saving of fuel. in proof of what is said about the superiority of the saimers-Spence Air Space, see Scientific American, c. 1, 187, and London Engineering, July 18, 1877.
